

Maurice^{*}

Hear the space. Capture the height. Experience the immersion.

Inspired by ORTF: Built on the proven stereo technique with microphones spaced 17 cm apart at $\pm 55^\circ$.

Immersive by design: Four ORTF pairs, rotated vertically and arranged in a cross, add realistic height and depth to your recordings.

Flexible output: Capture in immersive multichannel formats or easily decode into binaural stereo.

Smart engineering: 3D-printed frame, premium 16 mm cardioid capsules, and elegantly simple circuitry powered by standard 48 V phantom power.

Ready for anything: From standalone immersive capture to Dolby Atmos workflows, Maurice brings clarity, space, and dimension to your sound.

Maurice makes immersive audio simple, portable, and professional.
